3D model your LED project in Fusion360
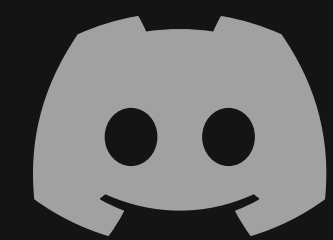

Beginners workshop

F360.glowingkitty.com

Join us on Discord

discord.glowingkitty.com

- share projects you are working on

- get help, inspiration & feedback

- meet other LED enthusiasts

What do we learn today?

- How to build a simple case for a PCB
- Learn the basics of sketches and parametric design
- How to export for 3D printer
- How to export for lasercutter
- Additional useful resource
- Preview of additional features (if there is time)
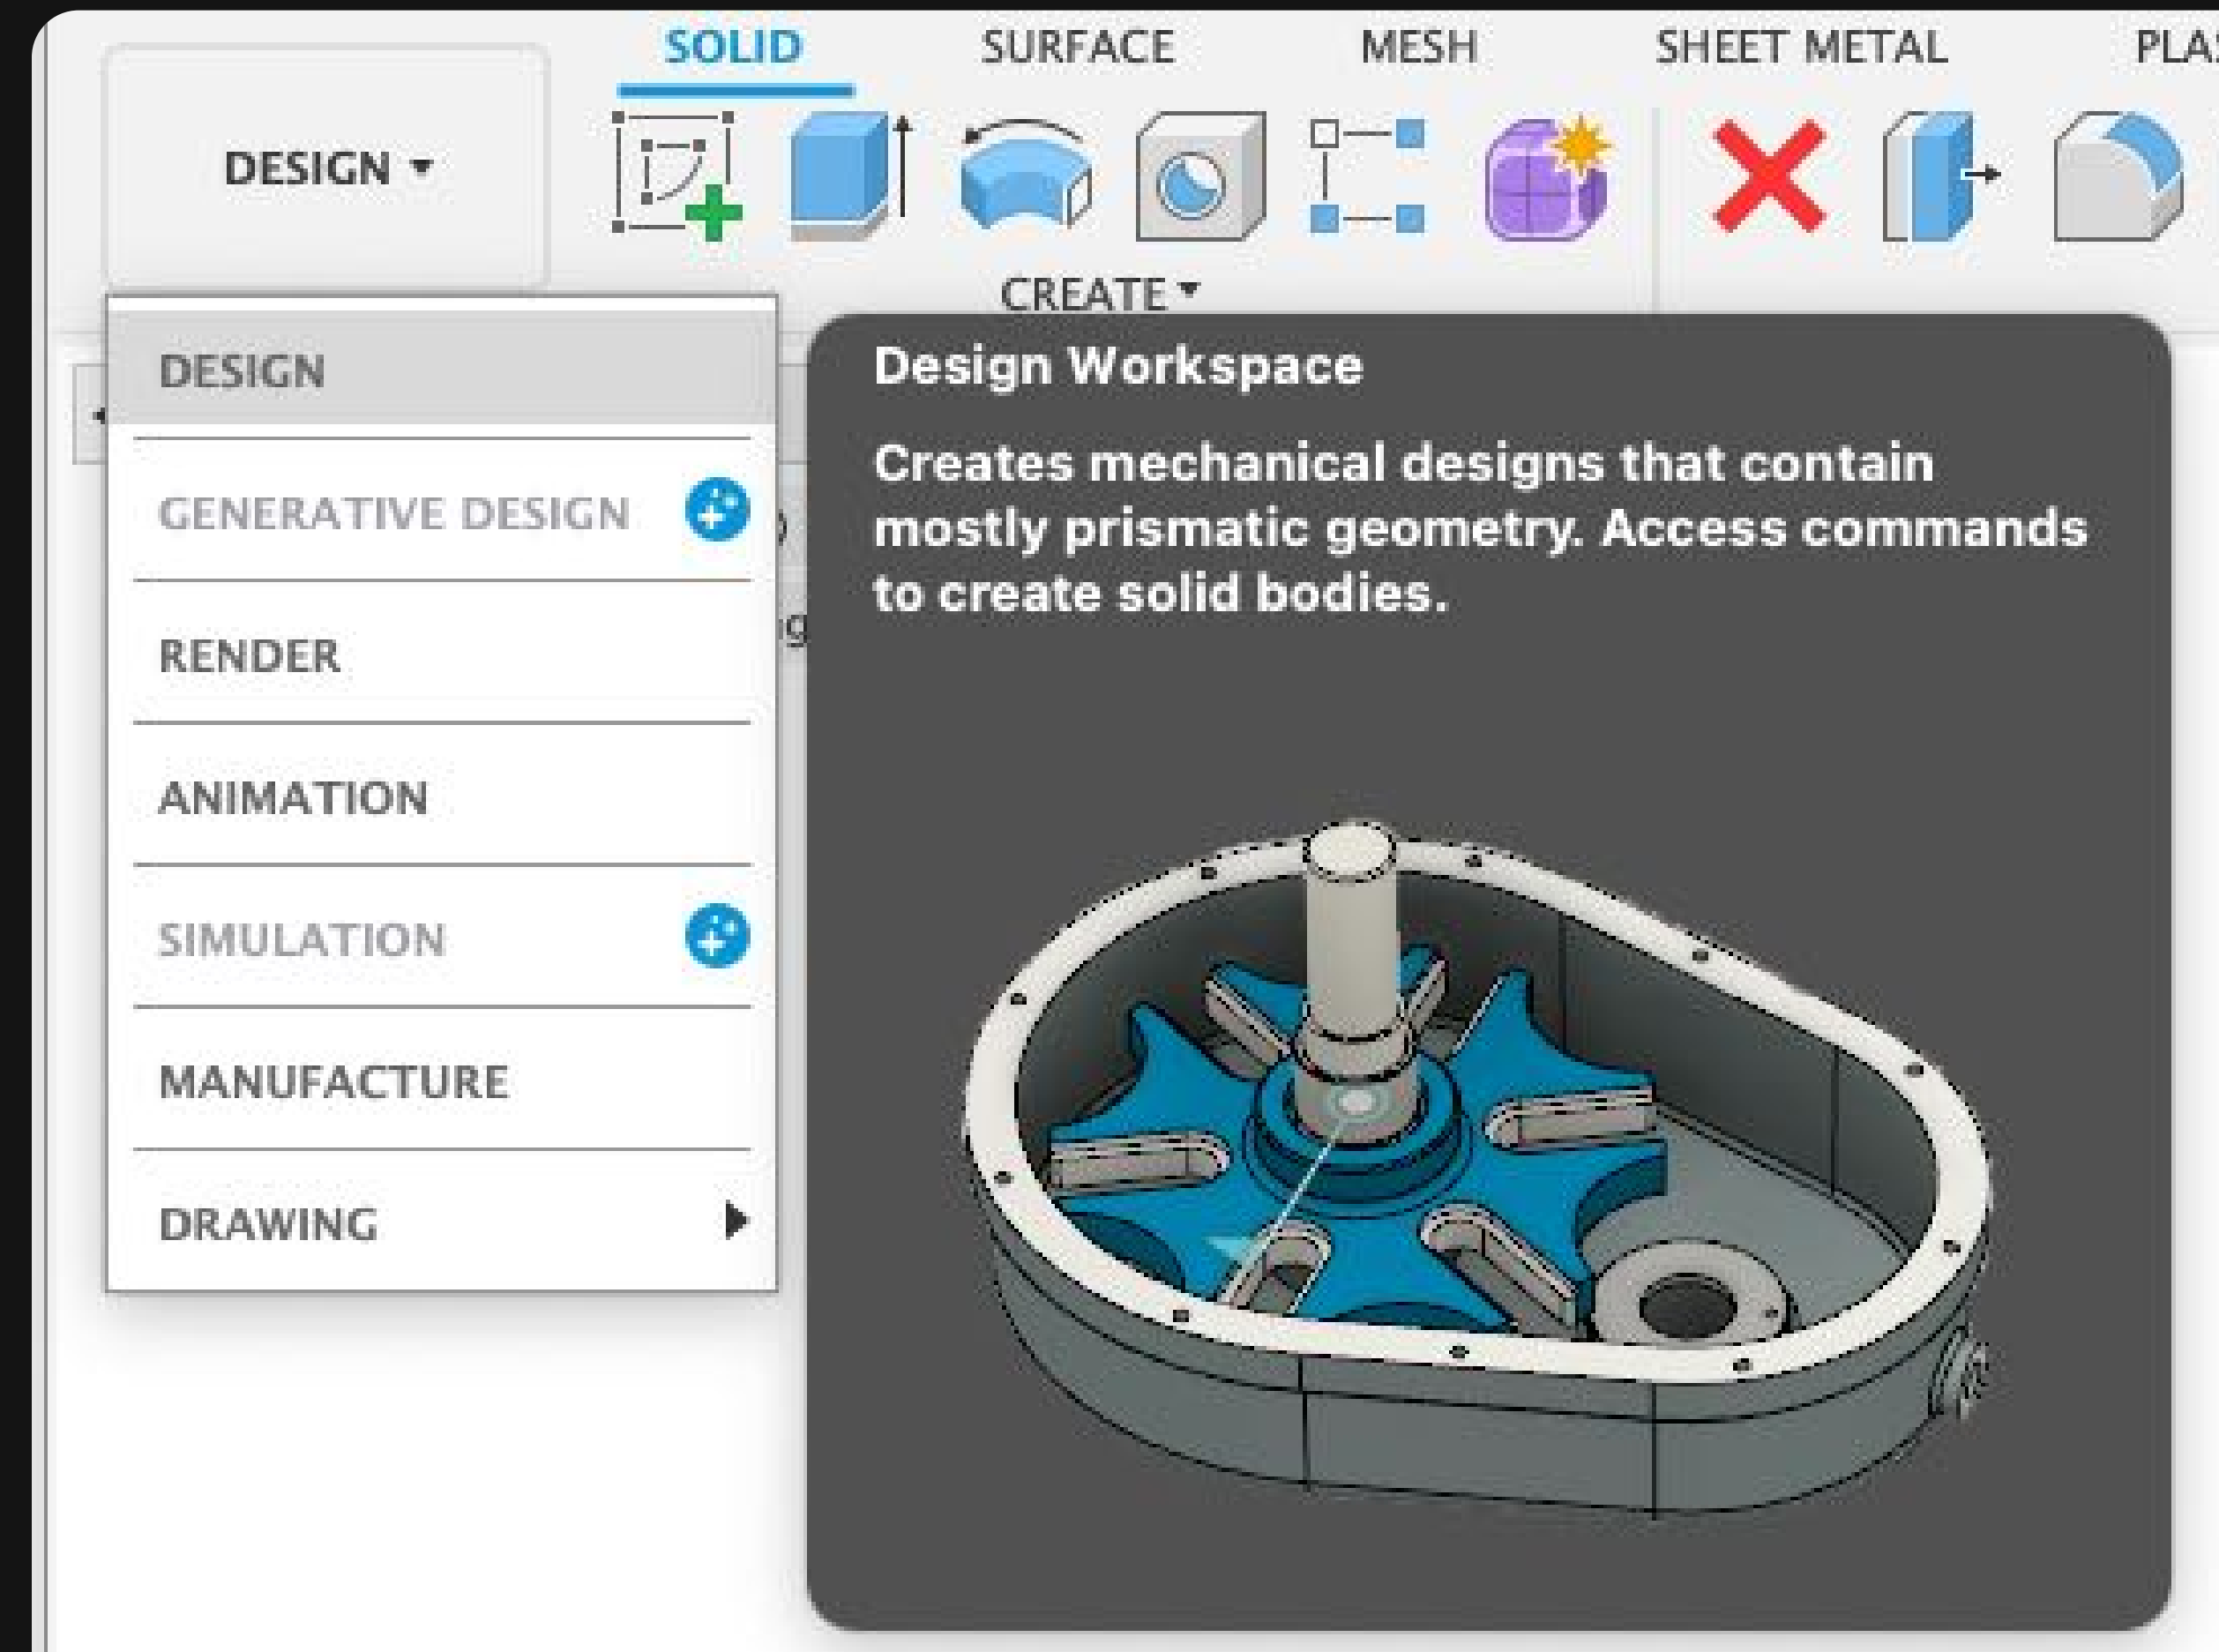

A quick overview

Fusion360

What I recommend it for:

- design DIY projects / products for:
  - 3D printer
  - lasercutter
  - plotter
  - CNC
- design PCB edge cut / shape

Fusion360

- best combination of usability + features
- free to use for hobby projects
- be aware of the cloud

Let's design a PCB case!
